EXPERIENCE

Web Developer & UX/UI Designer,

University of Virginia Library
March 2011 – Present

Manage, perform user centered design, develop and maintain various U.Va. Library websites. I design and develop responsive websites built with Wordpress CMS, HTML5, CSS3 and JavaScript.

Founder and Lead Organizer,

Google Developer
Group - Central Virginia
January 2015 – Present

Work with ongoing support from Google to provide technical training on emerging Google technologies.

Web Developer,

Web Communications,
University of Virginia
August 2010 – March 2011

Managed, designed, developed and maintained the main College and Graduate School of Arts & Sciences website, Campaign for the College fundraising website, and various A&S department websites. I wrote HTML, CSS, JavaScript and PHP as well as built themes in Wordpress.

Web Developer,

College & Graduate School of Arts
& Sciences, University of Virginia
March 2008 – July 2010

Managed, designed, developed and maintained the main College and Graduate School of Arts & Sciences website, Campaign for the College fundraising website, and various A&S department websites with HTML, CSS, JavaScript, and PHP. I practiced user experience design processes, user testing, and user interface design. I also maintained a Wordpress blog for the Dean.

Entrepreneur & Senior Designer,

Equinox Multimedia
September 2003 – March 2008

Consulted with clients, planned and managed web and graphics projects, designed and developed graphics materials, websites, Flash web applications, and other forms of interactive media. I built websites using HTML, CSS, JavaScript, Flash, and Wordpress.
